Meet Carina: The Affordable Safety Solution

The first safety IoT platform to protect people and link device management with building intelligence; creating the next generation of mass notification.

Reach out
Allows people and buildings to reach out for help

Coverage
Reach everyone without missing critical information

Reliable
Continues to operate during internet and power outages

Affordable
Nex-gen features for legacy system pricing and no licensing fees

Intelligent Devices
Carina endpoints are the backbone of the system to help you achieve your safety goals and maintain an unbroken chain of communication.

Future-Proof Design
New software upgrades for no additional fee.

Prevent Communication Breakdowns

Automate your safety plan
Custom Carina scripts eliminates points of failure for each emergency scenario.

Reliable during any situation
Operates during loss of power, internet etc

IoT Sensor Network
Allows buildings to reach out for help, preventing small problems from becoming big ones

Stop relying on the unreliable.
People make poor decisions during stressful or emergency situations, Carina automates everything for a streamlined safety response.

Provides Full Coverage
Text, flashers, and audio alerts both indoors and outdoors.

Offline Device Alerts
Monitors network performance and reports back when specific devices stop responding.

Carina Platform Means Peace-of-Mind
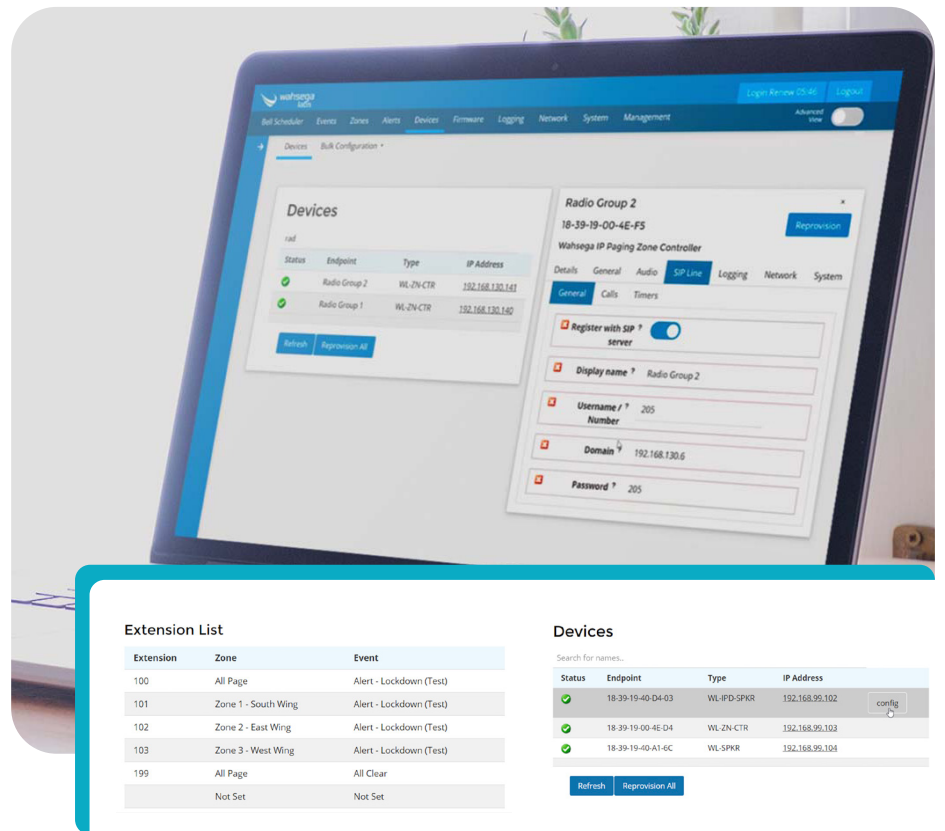

Simplified Management

- ✔ Setup & Management
- ✔ Zero-touch provisioning
- ✔ Auto-syncing clocks
- ✔ Device health reports
- ✔ Customizing messages, tones, flashers, bells
- ✔ Simple creation of Carina Scripts
- ✔ Simple device firmware updates
- ✔ Powerful calendar scheduling; From recurring alerts to device management

Life Safety

- ✔ **Automated messages**
  - → Inclement Weather
  - → Active Shooter and intruders
  - → Medical emergencies
  - → Student physical altercations
  - → Workplace accident
  - → Environmental hazards
- ✔ Lockdown an entire campus with the push of a button

KEY FEATURES

- ✔ Powerful Calendar Scheduling

- ✔ Hybrid/Cloud design allows you to configure and manage from anywhere through a single dashboard*

- ✔ Maintains full functionality when the internet goes out

- ✔ Our platform last 10x longer on UPS during power outages

- ✔ Network of smart IoT sensors to avoid costly disasters

- ✔ Reach everyone with text, flashers, and audio both indoors and outdoors.
